

QUALITY, HEALTH & SAFETY, AND ENVIRONMENT POLICY

The *Compagnia Torinese Monitoraggi*, or **CITIEMME S.r.I.**, was established in January 1996 to operate in the field of instrumental measurements for territorial monitoring and civil engineering investigations.

CITIEMME S.r.I., active in the fields of geological, geotechnical, and environmental investigations, is fully aware of the significance of its operations for territorial safety, environmental protection, and the reliability of civil works.

Within this context, the Company has therefore adopted an **Integrated Management System** compliant with the ISO 9001 (Quality), ISO 45001 (Occupational Health and Safety), and ISO 14001 (Environment) standards, with the aim of providing highly qualified, safe, and sustainable technical services.

QUALITY

- Ensure high technical reliability of investigations, in compliance with national and international standards and regulations
- Continuously improve techniques and operational methodologies, also thanks to the use of advanced technologies (e.g., instrumented drilling, digital monitoring)
- Maintain transparent and constructive dialogue with clients, designers, and public authorities, ensuring maximum traceability and accuracy of the collected data
- Train technical and operational staff to guarantee competence and professionalism at every stage of service delivery

HEALTH & SAFETY

- Ensure the protection of workers' health and safety, especially in high-risk operational contexts (e.g., construction sites, unstable areas, confined spaces)
- Adopt appropriate preventive and protective measures for every investigation activity, in accordance with specific risk assessments
- Promote a culture of safety among all staff and collaborators, encouraging active involvement, and the reporting of potentially hazardous situations
- Strictly comply with the applicable safety legislation (Italian Legislative Decree 81/08 and subsequent amendments)

ENVIRONMENT

- Minimize the environmental impact of field activities by reducing excavations, soil movement, and ecosystem disturbance to the bare minimum
- Ensure proper management and disposal of waste generated by drilling and sampling activities
- Promote low-impact and sustainable practice, such as the use of electric equipment, lowemission vehicles, and non-invasive monitoring systems
- Comply with all applicable environmental laws and regulations, preventing any form of pollution

Top Management is committed to sharing such Policy at all levels of the organization, supporting it with adequate resources, and reviewing it periodically to ensure its effectiveness, consistency, and suitability in light of regulatory, technological, and organizational developments.
